

Dear Sir/Madam,

I would like to express my STRONG opposition to the NAB petition 04-160. If this petition is allowed to go into law, what next? Will the very satellite radio concept be challenged? I am paying XM to provide me with these services and it is available for free through NAB; so that should send a strong indication to the NAB members that their quality of programming is substandard.

The satellite radio concept is just another specialized media service like satellite TV and cable TV. The consumer pays a premium, willingly, to get features not available or not AS available on public broadcast. That is a right as a consumer to have choices.

Please don't let this petition go any further. Thank you.
